### 5.3 Advice for firefighters

Protective equipment      Mouth respiratory protective device.  
Wear self-contained respiratory protective device  
Do not enter fire area without proper protective equipment, including respiratory protection

#### **5.4 Specific extinguishing methods:**

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Remove undamaged containers from fire area if it is safe to do so.

Avoid breathing fire gases or vapours.

Evacuate area.

Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk.

Cool containers exposed to flames with water until well after the fire is out.

Avoid discharge to the aquatic environment.

Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.

#### **5.5 Fire Fighting Equipment/Instructions:**

In the event of fire, Use personal protective equipment, protective clothing and equipment suitable for the surrounding fire, including helmet, facemask, and wear self-contained breathing apparatus.

#### **5.6 NFPA Rating:** Health:3 Fire: 1 Reactivity: 0

Hazard Scale: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe

#### **5.7 Further information:**

### **6. ACCIDENTAL RELEASE MEASURES**

---

#### **6.1 Personal precautions, protective equipment, and emergency procedures:**

No action shall be taken without appropriate training or involving any personal risk.

Keep unnecessary and unprotected personnel away from the spillage.

Wear protective clothing as described in Section 8 of this safety data sheet.

Follow precautions for safe handling described in this safety data sheet.

Wash thoroughly after dealing with a spillage.

Ensure procedures and training for emergency decontamination and disposal are in place.

Do not touch or walk into spilled material without PPEs.

Avoid contact with skin and eyes.

Wear protective clothing as described in Section 8 of this safety data sheet.

Clear up spills immediately and dispose of waste safely.

Approach the spillage from upwind.

Absorb with liquid-binding material (sand, diatomite, universal binders, sawdust).

Clean the affected area carefully;

#### 6.4 Methods and materials for cleaning up:

If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container.

If leakage cannot be stopped, evacuate area. Flush spilled material into an effluent treatment plant, or proceed as follows.

The contaminated absorbent may pose the same hazard as the spilled material. Flush contaminated area with plenty of water.

Wash thoroughly after dealing with a spillage.

#### 6.5 Further Information:

Dangerous for the environment. Do not empty into drains. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.
